

SAF-Dimensioned Bearing Interchange

Engineered for performance, built to last

Safety Mount® ISAF mounted spherical roller bearing

- Pre-assembled and pre-lubricated at the factory to simplify installation
- Capable of +/- one degree static or dynamic misalignment
- Optimized housing design uses 80 percent less grease than SAF bearings
- Robust sealing system protects lubrication from contamination to extend bearing life

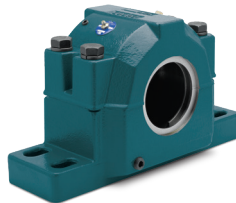

TAF Harsh Duty™ mounted tapered roller bearing

- Double-row tapered rolling elements with industry-leading capacity ratings
- ArmorTect sealing system features four points of contact and two trash guards for maximum protection against contamination
- 65-degree set screw angle maximizes shaft holding power
- Factory-sealed inner unit uses 75 percent less grease than SAF-style bearings and eliminates opportunity for contamination during installation

USAF mounted spherical roller bearing

- Cast-in dimples locate drill holes for lube fitting, vents, and mounting modifications
- Standard housings have two oversized drains compatible for circulating oil systems
- Pry slots enable easy separation of the pillow block
