

Gear Reducer Remanufacturing

Designed, manufactured, and serviced by name you trust

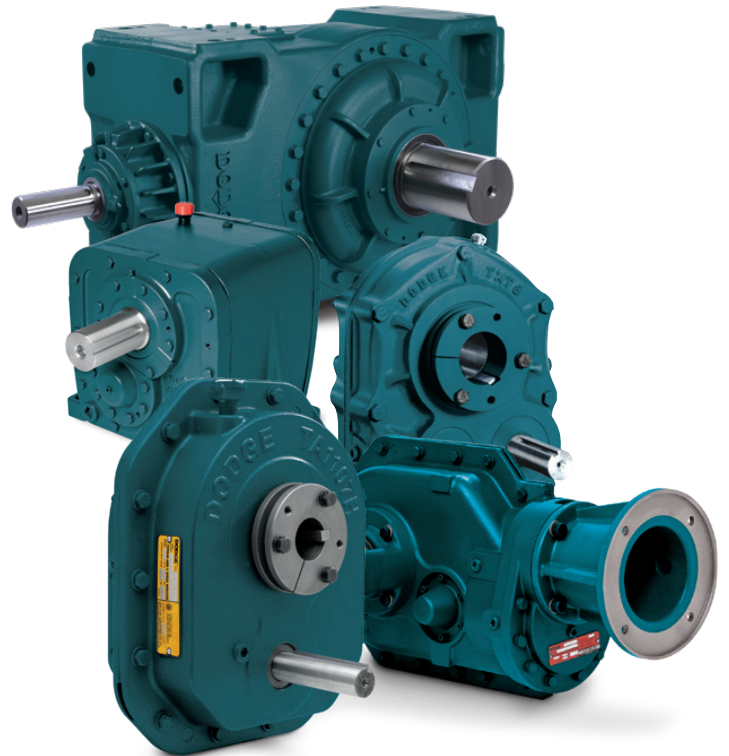

Through our Mechanical Services, we offer remanufacturing of MagnaGear XTR®, Maxum® XTR, and the Torque-Arm family of gear reducers to restore them back to factory specifications. Each remanufactured gear reducer is inspected before it goes out the door to ensure it meets the highest quality standards our products are known for, giving you peace of mind that each unit is as dependable as a brand new one.

Advantages of remanufacturing

- Reset to original factory specifications
- Genuine factory parts
- All new hardware installed
- Same factory warranty as new products
- New nameplate with traceable serial number
- All work completed by Dodge® factory-trained technicians
- Detailed inspection on every reducer unit returned
- Return freight included

Remanufacture levels for any situation

- Level 1: Bearings and seals are replaced
- Level 2: Input gear set, all seals and bearings are replaced
- Level 3: Complete factory reset with all gearing, bearings, and seals replaced
