

Dodge® X2000 On-Premise Gateway

Software Release Notes

Version 1.2

The Dodge X2000 On-Premise Gateway v1.2 software is based on the Cassia Networks™ X2000 On-Premise Gateway v0.64 release.

What's New:

- Peak acceleration has been added as a KPI
- Raw acceleration data can now be downloaded
- Sensors can now be replaced with no changes to OPC-UA or CIP setups.
- Raw sensor data can now be single axis or tri-axis
- Fixed a bug that reported incorrect PLC states
- Added backwards-compatibility for restoring from legacy configurations

Fixed Issues:

- Deleted sensors with no data no longer display in historical data
- Bluetooth connection improvements
- Database performance improvements
- Fixed issue with the last sensor in the list occasionally not exporting KPIs
- Fixed issue with persistent sensors after deletion

Known Issues:

- No known issues
