

Torque-Arm Family Remanufacturing

Designed, manufactured, and now serviced by name you trust

Lifecycle Solutions remanufactures Torque-Arm family shaft-mount reducers to factory specifications. All work is performed using genuine Dodge® parts to factory specifications, creating remanufactured reducers you can depend on.

Dodge advantage:

- Remanufactured to original factory specifications
- Genuine factory parts
- All new hardware installed
- Remanufactured products have the same factory warranty as new products
- New nameplate with traceable serial number
- All work completed by Dodge factory-trained technicians
- Return freight included

Remanufacture levels for any situation:

- Level 1: The bearings and all seals are replaced
- Level 2: Input gear set, all seals and bearings are replaced
- Level 3: Complete factory reset with all gearing, bearings, and seals replaced
