

MOUNTED BALL BEARINGS

Agriculture Duty

vs. Fafnir RAK

The Agriculture Duty mounted ball bearing is the premier solution—built on the Dodge® legacy of innovation and reliability. Unlike Fafnir RAK, Agriculture Duty is engineered for all-season performance in above- and in-ground applications. With uniquely designed features, from an eccentric locking collar to a shielded triple-lip sealing system and patented Maxlife cage, Agriculture Duty is built to thrive when others fail. Its dimensionally interchangeable design makes it easy for you to upgrade applications from Fafnir RAK to the superior Agriculture Duty solution without having to modify your equipment design.

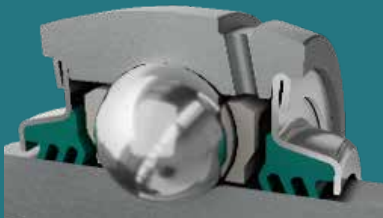

When the harshest conditions call for unmatched quality, value, and performance, don't settle for less than the best. Agriculture Duty is the ideal solution for maximizing your output throughout the season.

The value of Agriculture Duty

Maximum protection

Shielded triple-lip sealing system keeps contaminants away while its innovative, mechanically-retained design enables grease to purge without the risk of seal blowout.

Maximum performance

Patented, two-piece Maxlife cage creates a grease compartment around each ball rolling element for constant grease contact, minimizing friction while preventing grease washout.

The bi-directional eccentric collar enables simple and secure installation—no matter the application.

Factory-filled to 100 percent with synthetic grease for reduced friction, lubricating the rolling elements and raceway even in low-speed applications, and for added protection from contamination ingress.

3-year warranty surpasses the competition for all-season performance you can rely on.

Manufactured in the USA at our ISO 9001:2015-certified facility in Rogersville, TN for world-class quality and unrivaled lead times.

Dodge Agriculture Duty	VS	Fafnir RAK
Triple-lip	Seal points of contact	Single-lip
✓	Shielded sealing system	✗
Patented Maxlife, double-sided	Cage	Generic nylon, single-sided
Synthetic (longer life)	Grease type	Mineral-based
100 percent	Grease fill	?
3 years	Warranty	1 year
USA	Manufacturing location	China
